# THE POWER OF THREE

- LIMITED EDITION -

TRIO CLUSTERED DIODE TECHNOLOGY  
FOR LASER HAIR REMOVAL

3 Combined Wavelengths Covering the Optimal Spectrum

• Proven Safety Record • Virtually Painless • All Skin Types, Even Tanned Skin

**Alma**  
For You. For Life.

As an integrated solution, Soprano ICE Platinum combines the benefits of all 3 wavelengths, achieving excellent results to any single-wavelength approach on its own.

Celebrating 10 years of award-winning success, Alma Lasers is proud to present **Soprano ICE Platinum**, featuring **trio clustered diode technology**. The Platinum edition combines 3 laser wavelengths into a single innovative handpiece, **simultaneously** targeting different tissue depths as well as anatomical structures within the hair follicle. By combining the absorption and penetration levels of three different wavelengths, along with the treatment coverage, comfort and low maintenance of the diode laser, Soprano ICE Platinum achieves the safest and most comprehensive hair removal treatment available today.

### TRIO CLUSTERED DIODE TECHNOLOGY

Soprano ICE Platinum offers the synergistic benefits of the 3 most effective wavelengths for hair removal, each targeting different structures within the hair follicle.

The 3 main anatomical targets include the Bulge, Bulb and Papilla.

### ALEX 755nm WAVELENGTH

The Alexandrite wavelength offers more powerful energy absorption by the melanin chromophore, making it ideal for the widest range of hair types and color- especially light-colored and thin hair. With more superficial penetration, the 755nm wavelength targets the Bulge of the hair follicle and is especially effective for superficially embedded hair in areas such as the eyebrows and upper lip.

### SPEED 810nm WAVELENGTH

The classic wavelength in laser hair removal, the 810nm wavelength, offers deep penetration of the hair follicle with high average power, a high repetition rate and a large 2cm spot size for fast treatment. The 810nm has a moderate melanin absorption level making it safe for darker skin types. Its deep penetration capabilities target the Bulge and Bulb of the hair follicle while moderate tissue depth penetration makes it ideal for treating the arms, legs, cheeks and beard.

### YAG 1064nm WAVELENGTH

The YAG 1064 wavelength is characterized by lower melanin absorption, making it a focused solution for darker skin types. At the same time, the 1064nm offers the deepest penetration of the hair follicle, allowing it to target the Bulb and Papilla, as well as treat deeply embedded hair in areas such as the scalp, arm pits and pubic areas. With higher water absorption generating a higher temperature, the incorporation of the 1064nm wavelength increases the thermal profile of the overall laser treatment for most effective hair removal.

THE POWER  
OF THREE

“ The revolutionary Soprano Platinum Trio handpiece offers coverage and efficacy levels that have never before been achieved. Having the three most effective wavelengths operating simultaneously is groundbreaking for the laser hair removal industry. ”

**Prof. Dr. Uwe Paasch**, University Clinic of Leipzig, Germany

“ The combination of the 3 different wavelengths enables practitioners to achieve better efficacy and highest coverage by simultaneously reaching different anatomical depths of the hair follicle laser targets. This is the first time such a comprehensive treatment can be performed with just a single applicator. ”

**Joseph Lepselter**, VP Clinical Affairs Alma Lasers

SHR™ BY ALMA LASERS

SHR is Alma Laser's proprietary hair removal method used in clinics around the world with global brand recognition in the past 10 years.

SHR works by gradually heating the dermis to a temperature that effectively damages the hair follicles and prevents re-growth, while avoiding injury to the surrounding tissue.

“ I believe Soprano SHR is the first innovation in laser hair removal in the past 10 years. We are now able to treat all skin types safely, with less pain and without compromising efficacy. ”

**Martin Braun**, MD Vancouver Laser Center, Vancouver, BC, Canada

“ Soprano SHR has revolutionized medical photoepilation, contributing longer lasting and better results compared to conventional technologies. 'IN-Motion' treatment, applying low fluence at high repetition rates, enables us to provide customized photoepilation for each patient. Soprano works with all skin and hair types, all year round, with consistent, safe, reliable results. Today Soprano SHR is an essential tool for aesthetic practices, providing more patient advantages than any of its competitors. ”

**Fernando Urdiales**, MD Director of Miramar Medical Institute, Malaga, Spain

INNOVATIVE  
3-IN-1  
APPLICATOR

SUITABLE FOR ALL SKIN  
TYPES, INCLUDING  
TANNED SKIN

10 YEARS OF  
CLINICALLY PROVEN  
EFFECTIVENESS

NO CONSUMABLES

EASY TO OPERATE
